-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 December 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 7-14, 21-29 and 37-47 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 7-14, 21, 22, 24, 25 and 37-46 is/are allowed.
- 6) ☒ Claim(s) 23, 26-29, 47 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 23, 26, 29, 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzawa et al. (US 6,515,336) and Wolf (Silicon Processing for the VLSI Era)

Lin describes a method for forming taper lines comprising: forming a laminated-layer structure having three layers made from conductive layers (claimed forming 1st, 2nd, and 3rd conductive layers on top of each other); etching the first to third conductive layers to form a conductive layer with a taper portion by dry etching (claimed patterning the conductive layers to form a conductive layer with a taper portion) (col. 10, line 64-col. 11, line 20; col. 12, line 6-29). Unlike claimed invention, Lin doesn't describe subjecting the conductive layer with a taper portion to a plasma treatment. However, figures 3A and 3B shows that the resist has to be removed in order to form the layer 142 and Wolf shows that the conventional resist stripper includes subjecting the resist, and the conductive layer since it is exposed by the resist layer, to an oxygen plasma (page 518). Therefore, it would have been obvious for one skill in the art to remove the resist in light of Wolf's teaching because Wolf further describes a method to remove the resist that is silent in Lin in order to clear the resist for the next step.

Referring to claim 26, Suzawa suggests the 1st conductive layer can be comprises of W (col. 11, line 9).

Art Unit: 1765

Referring to claim 47, since the conductive layers made up of metals and exposed to oxygen plasma during resist stripping, they would be oxidized.

3. Claims 27, 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzawa and Wolf as applied to claim 23 above, and further in view of Colgan et al. (US 5,912,506).

Referring to claims 26, 28, Suzawa doesn't suggest the second conductive layer comprises of Al and the third conductive layer comprises of Ti. He teaches that the TFT can be a laminated-layers of three different conductive layers (col. 11, line 1-20). Colgan describes different structures that having a first layer of Mo or W, the second layer of Al, and the third layer of Ti (col. 3, line 5-52). Therefore, it would have been obvious for one skilled in the art at the time of the invention to use other type of materials as suggested by Colgan in order to form a TFT structure with a reasonable expectation of success.

Allowable Subject Matter

4. Claims 7-22, 24, 25, 37-46 remained allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 23, 26-29, 47 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

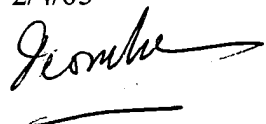

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DuyVu n Deo whose telephone number is 571-272-1462. The examiner can normally be reached on 6:00-3:30; with alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on 571-272-1465. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
